## Abstract

The emergence of the fields of computational biology and bioinformatics has alleviated the burden of solving many biological problems, saving the time and cost required for experiments and also providing predictions that guide new experiments. Within computational biology, machine learning algorithms have played a central role in dealing with the flood of biological data. The goal of this tutorial is to raise awareness and comprehension of machine learning so that biologists can properly match the task at hand to the corresponding analytical approach. We start by categorizing biological problem settings and introduce the general machine learning schemes that fit best to each of these categories. We then explore representative models in further detail, from traditional statistical models to recent kernel models, presenting several up-to-date research projects in bioinformatics to exemplify how biological questions can benefit from a machine learning approach. Finally, we discuss how cooperation between biologists and machine learners might be made smoother.

# CBI-KSBSB CONFERENCE

## SCOPE

We warmly invite you to attend the Joint Conference of the Chem-Bio Informatics (CBI) Society of Japan and the Korean Society for Bioinformatics and Systems Biology (KSBSB). Both societies started to organize annual meetings from the year 2000, and this Joint Meeting will be, for each, their 10th International Meeting. Both societies have promoted biological and chemical and biological computing and informatics especially focused on in silico simulation of the biological systems and on unveiling disease mechanisms at the molecular level and on in silico drug design. The annual meetings of these societies have attracted not only academic researchers but also those who are working in biotech or pharmaceutical industries and IT solution companies.

Many delegates from China, other East Asian countries, and others from around the world are also welcome to come to the attractive beaches of Busan in Korea to learn about and to discuss recent advances in the broad areas of interest in biological and chemical and biological informatics and computing and their applications within the network scope of disease biological understanding and drug discovery.

## PROGRAM CONTENTS

- ✓ 4 Plenary Lectures
- ✓ 8 Scientific Sessions
  - Two parallel tracks (two hours per session)
  - The symposia will consist of invited talks only (5-6 speakers for each session)
  - Co-organizer and co-chair system between Korean & Japanese societies
- ✓ Poster Sessions of 12 topics
- ✓ 4 Tutorials
- ✓ 3 Industry Luncheon Workshops

## Plenary Lectures

### Plenary Lecture 1

11:30-12:30, Thursday, Nov. 5, 2009 (Hall A)

**Yukio Tada** (Chemical Biology Research Initiative, The University of Tokyo, Japan)  
“Lessons learned in participating CBI Society and successful drug design”

### Plenary Lecture 2

16:30-17:30, Thursday, Nov. 5, 2009 (Hall A)

**Hong Gil Nam** (Pohang University of Science & Technology, Korea)  
“Modeling senescence and death in plant leaves”

### Plenary Lecture 3

11:30-12:30, Friday, Nov. 6, 2009 (Hall A)

**Johann Gasteiger** (Molecular Networks, Germany)  
“The German HepatoSys Project”

### Plenary Lecture 4

16:30-17:30, Friday, Nov. 6, 2009 (Hall A)

**Tomoko Niwa** (Discovery Research Laboratories, Nippon Shinyaku Co.,Ltd., Japan)  
“Elucidation of Characteristic Structural Features of Protein Kinases:  
A Neural Network Approach”

## Scientific Sessions

### Session 1

#### Translational Bioinformatics for Personalized Medicine

09:00-11:00, Thursday, Nov. 5, 2009 (Hall A)

*Co- Chairs:* **Juhan Kim** (Seoul National University, Korea)  
**Hiroshi Tanaka** (Tokyo Medical and Dental University, Japan)

S1-1

09:00-09:30

Systems Pathology - A new concept for understanding disease -

**Hiroshi Tanaka** (Tokyo Medical and Dental University, Japan)

S1-2

09:30-10:00

Omics analysis for biomarker discovery and personalized medicine

**Kazuhiko Uchida**

(Graduate School of Comprehensive Human Sciences University of Tsukuba, Japan)

S1-3

10:00-10:30

Pathway-wise co-expression network in lung cancer

**Sung Bum Cho** (Ewha Womans Medical Research Institute, Korea)

S1-4

10:30-11:00

Semantic Signature: biological interpretation of gene expression

Microarray data on a semantic space

**Jihun Kim** (National Institute of Health, Korea)

**Session 2**

**AHeDD (Asia Hub for e-Drug Discovery)**

09:00-11:00, Thursday, Nov. 5, 2009 (Hall B)

*Co-Chairs:* **Kyoung Tai No** (Yonsei University, Korea)  
**Yutaka Akiyama** (Tokyo Institute of Technology, Japan)

**S2-1**

09:00-09:20

Recent Activity of AHeDD

**Kyoung Tai No** (BMDRC, Yonsei University, Korea)

**S2-2**

09:20-10:00

Ligand-based SAR-omics as a paradigm for the lead evolution in drug design

**Toshio Fujita** (Kyoto University, Japan)

**S2-3**

10:00-10:30

Pharmacophore modeling in drug discovery: perspectives, challenges, and advances

**Sheng-Yong Yang** (Sichuan University, China)

**S2-4**

10:30-11:00

Biological Network Based Drug Design

**Luhua Lai** (Peking University, China)

**Session 3**

**Network and Systems Biology**

14:00-16:00, Thursday, Nov. 5, 2009 (Hall A)

*Co-Charis:* **Kwang-Hyun Cho** (Korea Advanced Institute of Science and Technology, Korea)

**Masahiro Okamoto** (Kyushu University, Japan)

**S3-1**

14:00-14:30

An integrative modeling of afterload-induced cardiac hypertrophy: from contractile proteins to system

**Eun Bo Shim** (Dept. of Mechanical & Biomedical Engineering, Kangwon National University, Korea)

**S3-2**

14:30-15:00

A system-level study on the emergent properties of biological interaction networks

**Kwang-Hyun Cho** (Department of Bio and Brain Engineering, Korea Advanced Institute of Science and Technology (KAIST), Korea)

**S3-3**

15:00-15:30

Construction and analysis of drug networks

**Susumu Goto** (Bioinformatics Center, Institute for Chemical Research, Kyoto University, Japan)

**S3-4**

15:30-16:00

How to determine essential regulatory relations of amino acids in amino acid metabolism

**Masahiro Okamoto** (Laboratory of Bioinformatics, Graduate School of Systems Life Sciences, Kyushu University, Japan)

**Session 4**

**Drug Discovery and Design**

14:00-16:00, Thursday, Nov. 5, 2009 (Hall B)

*Co-Chairs:* **Sun Choi** (Ewha Womans University, Korea)  
**Yuji Takaoka** (Taisho Pharmaceutical Co., Ltd., Japan)

**S4-1**

14:00-14:30

An integrated approach to knowledge-based target discovery

**Kenji Mizuguchi** (National Institute of Biomedical Innovation, Japan)

**S4-2**

14:30-15:00

Structure-based design of BACE-1 inhibitors

**Kyeongsik Min** (Drug Discovery, LG Life Sciences Ltd., Korea)

**S4-3**

15:00-15:30

Experimental Approaches to Advanced Structure-Based Drug Design

**Takayoshi Kinoshita** (Osaka Prefecture University, Japan)

**S4-4**

15:30-16:00

*In Silico* Studies of Novel Mechanism-Based Inactivators of  
S-Adenosylhomocysteine Hydrolase

**Sun Choi** (Ewha Womans University, Korea)

**Session 5**

**Emerging Technologies**

09:00-11:00, Friday, Nov. 6, 2009 (Hall A)

*Co- Chairs:* **Hanjo Kim** (Bioinformatics and Molecular Design Research Center, Korea)  
**Masafumi Yohda** (Tokyo University of Agriculture and Technology, Japan)

**S5-1**

09:00-09:25

From tip to toe in metabolomics: it's basic technique and advanced topics

**Yoshiaki Ohashi** (Human Metabolome Technologies Inc ., Japan)

**S5-2**

09:25-09:50

Automated System for Epigenetics

**Masaaki Takahashi** (Board of Director, Genetein Co. Ltd., Japan)

**S5-3**

09:50-10:15

Integrated Database Project for Life Science in Japan

**Toshihisa Takagi** (DBCLS [Database Center for Life Science],  
Research Organization of Information and Systems (ROIS);  
The University of Tokyo Japan)

**S5-4**

10:15-10:40

Recent progresses in u-Health informatics

**Yun Sik Kwak** (Kyungbuk National University, Korea)

**S5-5**

10:40-11:00

Transcriptome Analysis for Identifying Fusion Genes

**Sanghyuk Lee** (Ewha Womans University, Korea)

**Session 6**

**Metabolic Syndromes**

09:00-11:00, Friday, Nov. 6, 2009 (Hall B)

*Co-Chairs:* **Yasushi Okazaki** (Saitama Medical University, Japan)

**Kyong Soo Park** (Seoul National University, Korea)

**S6-1**

09:00-09:30

Cytochrome c oxidase subunit 7-related protein (COX7RP) modulates mitochondrial respiratory function and energy production

**Satoshi Inoue** (The University of Tokyo, Japan)

**S6-2**

09:30-10:00

An integrative approach for understanding mitochondrial diseases using novel proteomic profiling methods

**Daehee Hwang** (Pohang University of Science & Technology, Korea)

**S6-3**

10:00-10:30

Systems Biology of Osteoblast and Adipocyte Differentiation  
- Insight Into the Molecular Mechanism Underlying Osteoporosis and Metabolic Syndrome -

**Yasushi Okazaki** (Saitama Medical University, Japan)

**S6-4**

10:30-11:00

Leveraging benchwork and bioinformatics: How we identified a novel, functionally relevant cell-surface protein for the NKp30 ligand receptor

**Eugene C. Yi** (College of Medicine, Seoul National University, Korea)

**Session 7**

**Genome-wide Data Analysis**

14:00-16:00, Friday, Nov. 6, 2009 (Hall A)

*Co- Chairs:* **Jong-Young Lee** (Korean National Institute of Health, Korea)

**Akihiko Konagaya** (Tokyo Medical Dental University, Japan)

**S7-1**

14:00-14:30

Metabolomics provides new insights into systems biology

**Masahiro Sugimoto** (Graduate School of Media and Governance,  
Keio University, Japan)

**S7-2**

14:30-15:00

Linkage Disequilibrium between Polymorphisms of Single  
Nucleotide and Copy Number

**Sangsoo Kim** (Department of Bioinformatics, Soongsil University,  
Korea)

**S7-3**

15:00-15:30

Fission yeast chemical genomics for global drug target identification

**Minoru Yoshida** (RIKEN Advanced Science Institute, Japan)

**S7-4**

15:30-16:00

Genome-wide association study of bone mineral density in Korea

**Yoon Shin Cho** (Korea Centers for Disease Control and Prevention,  
Korea)

**Session 8**

**Chemical Biology and Chemical Genomics**

14:00-16:00, Friday, Nov. 6, 2009 (Hall B)

*Co- Chairs:* **Gyoonhee Han** (Yonsei University, Korea)

**Hiroyuki Toh** (Kyushu University, Japan)

**S8-1**

14:00-14:30

Discovery of Novel Cancer Chemotherapy based on Histone Modification

**Gyoonhee Han** (Department of Biotechnology, Yonsei University, Korea)

**S8-2**

14:30-15:00

Small Molecule Tools for Cell Biology and Cell Therapy

**Motonari Uesugi** (Institute for Chemical Research, Kyoto University, Japan)

**S8-3**

15:00-15:30

New small molecules suppressing hypoxia-induced ROS production and angiogenesis

**Ho Jeong Kwon** (Yonsei University, Korea)

**S8-4**

15:30-16:00

Chemical genetics of biological phenomenon: Nyctinastic movement of plants

**Minoru Ueda** (Tohoku University, Japan)

## Tutorials

- 4 tutorials on the first day

### Tutorial 1

#### Introductory Systems Biology

13:00-15:00, Wednesday, Nov. 4, 2009 (Hall A)

*Organizer:* **Masahiro Okamoto** (Kyushu University, Japan)

T1-1

13:00-13:40

Network analysis in systems biology

**Susumu Goto** (Institute for Chemical Research, Kyoto University, Japan)

T1-2

13:40-14:20

Web-based Resources for Metabolomics

**Masanori Arita** (The University of Tokyo, Japan)

T1-3

14:20-15:00

How to simulate cellular functions with the computational methods

**Hiroshi Matsuno** (Yamaguchi University, Japan)

### Tutorial 2

#### Statistical Genetics

13:00-15:00, Wednesday, Nov. 4, 2009 (Hall B)

T2

13:00-15:00

Statistical Methods for GWAS (Genome-wide Association Studies)

**Seungyeoun Lee** (Sejong University)

### Tutorial 3

#### Application of Machine-learning Algorithms

15:30-17:30, Wednesday, Nov. 4, 2009 (Hall A)

T3

15:30-17:30

Machine Learning and Applications in Biology

**Hyunjung (Helen) Shin** (Ajou University)

### Tutorial 4

#### Rational Drug Design

15:30-17:30, Wednesday, Nov. 4, 2009 (Hall B)

*Organizer:* **Hiroyuki Toh** (Kyushu University, Japan)

T4-1

15:30-16:30

Web services for function prediction of proteins

**Kengo Kinoshita** (The University of Tokyo, Japan)

T4-2

16:30-17:30

Fragment Molecular Orbital (FMO) Method: Application to Drug Discovery

**Hirofumi Watanabe** (Kobe University, Japan)

## Luncheon Workshops (industrial)

- Luncheon workshops on the second & third days
- Companies to support the joint conference

🌍 *A lunch box will be provided to a participant.*

### Workshop-1

**World Fusion Co. and Ariadne Genomics Co.  
(Japan)**

12:30-13:30, Thursday, Nov. 5, 2009 (Hall A)

### Workshop-2

**IBC (Interdisciplinary Bio Central) Journal  
(Korea)**

12:30-13:30, Friday, Nov. 6, 2009 (Hall A)

### Workshop-3

**KOBIC Organizes “KRIBB Session”  
(Korea)**

12:30-13:30, Friday, Nov. 6, 2009 (Hall B)

Special Event 21:30~, Thursday, Nov. 5, 2009

## Moonlight Cruise

🌍 Welcome Address : **Young Seo Park** (President of KISTI)

✓ It will be spoken in Japanese in 20min.

🌍 Interpreter: **Keun-Joon Park** (Principal Research Scientist, NIH)

“Security and Process Fee: **10,000 Won (800 Yen)**, Social Security Number or Passport Number should be presented at the registration desk before boarding.”

## Poster Sessions

-  **Posters will be posted at Hall C. Half will be posted on Noon, Nov. 4 (removed by Noon of Nov. 5) and Half will be posted on Noon, Nov. 5 as instructed to authors previously.**

Topics	Poster Number (Total <b>148</b> papers)
1. Bioinformatics of Health and Disease	P1-01 ~ P1-17 (17)
2. Disease Mechanism and Control Model	P2-18 ~ P2-20 (3)
3. Emerging New Technologies	P3-21 ~ P3-24 (4)
4. Genome-wide Data Analysis	P4-25 ~ P4-41 (17)
5. Genomics and Proteomics	P5-42 ~ P5-48 (7)
6. Information and Computing Infrastructure for Drug Design and Toxicology	P6-49 ~ P6-72 (24)
7. Molecular Computing	P7-73 ~ P7-90 (18)
8. Molecular Recognition	P8-91 (1)
9. Population Genetics and Variation	P9-92 ~ P9-97 (6)
10. Structure and Function Prediction	P10-98 ~ P10-108 (11)
11. Systems Biology and Networks	P11-109 ~ P11-123 (15)
12. Others	P12-124 ~ P12-148 (25)

-  **10 Best Poster Awards will be given at the closing ceremony.**

# POSTER PRESENTATION INFORMATION

## Methods of Payment

On-line Credit Card (US Dollar or Korean Won only)

## Registration Process

To attend the Conference, please select the following processes.  
Click the online-registration button on the website and use a fully secured e-commerce payment system.

## Registration Confirmation

A written confirmation and official receipt of your registration will be sent you once your registration form and payment are received.

## Cancellation and Refund Policy

If you want to cancel your plan, please contact KSBSB office (micky@kribb.re.kr, +82-42-860-4431). Please understand that some surcharge will be deducted from your refund as follows.

\*Refunds will be made after the Conference.

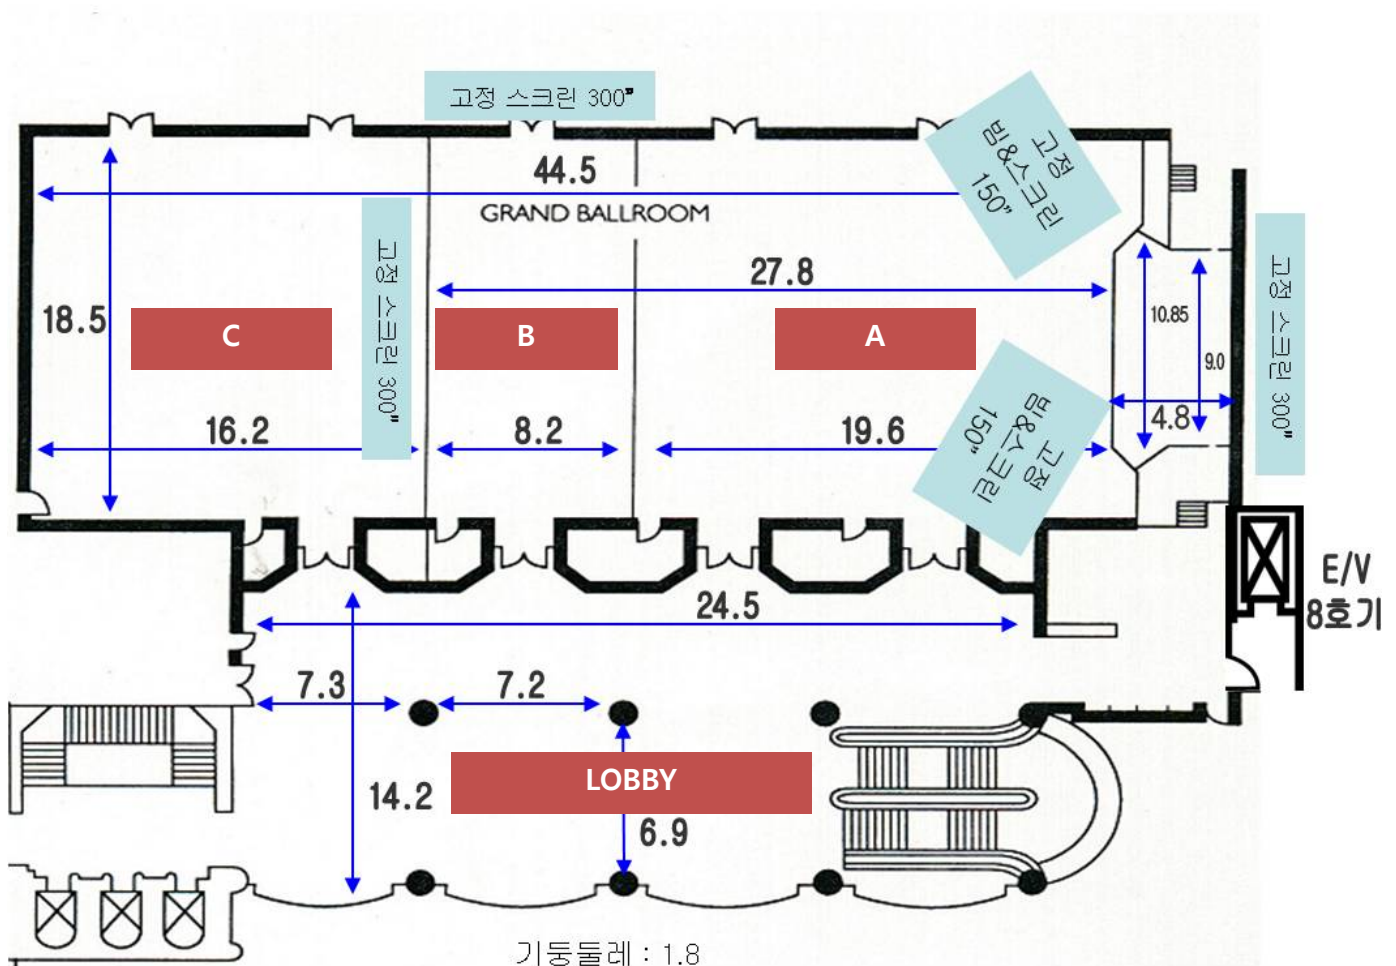

Date	Amount to be refunded
By Sep 30, 2009	90% of registration fee and Tour fee
By Oct 20, 2009	50% of registration fee and Tour fee
After Oct 21, 2009	No refunded

**Registration Site:** <http://www.ksbsb.or.kr>

## GRAND BALL ROOM (2F) GUIDE

- **Hall A** : Opening & Closing Ceremony, Invited speaker presentation, General Assembly, Tutorial, Workshop
- **Hall B** : Invited speaker presentation, Tutorial, Luncheon Workshop
- **Hall C** : Poster Presentation, Exhibiton, Welcome Reception
- **Lobby** : Registration Desk, Pre-View

## CONVENTION HALL (2F) GUIDE

## HAEUNDAE GRAND HOTEL <http://www.grandhotel.co.kr/>

### Information

In order to make reservations and obtain the special BioInfo2009 conference rates, please contact the Haeundae Grand Hotel (82-51-740-0555) and mention that you're attending KSBSB Conference. 100 rooms are reserved for first-come first-serve based.

The Haeundae Grand Hotel emerged on May 30th, 1996 on Haeundae Beach, one of the eight most scenic sites in the country. The brand new deluxe lodging facility combines sports facilities for a leisure hotel complex.

The hotel has not only 320 spacious guestrooms and banquet halls but also state-of-the-art facilities for leisure activities, which are all attuned for the new concept of

simultaneously satisfying the combined purposes of business, leisure and sports. As the largest integrated leisure hotel in the area with a floor space of 102,138m<sup>2</sup>, it features large-scale swimming pools occupying two floors including one pool as long as 50 meters with seven lanes which can accom-modate 1,000 persons, a 28-lane bowling hall, a theater within the hotel offering up-to-date audio and visual effects, a golf driving range. The hotel also has a hot spring bath loaded with natural minerals, equipped with special sauna docks for health buffs and other facilities.

For the special dining, there are multinational restaurants such as continental cuisine, Japanese, Chinese, as well as international buffet restaurants.

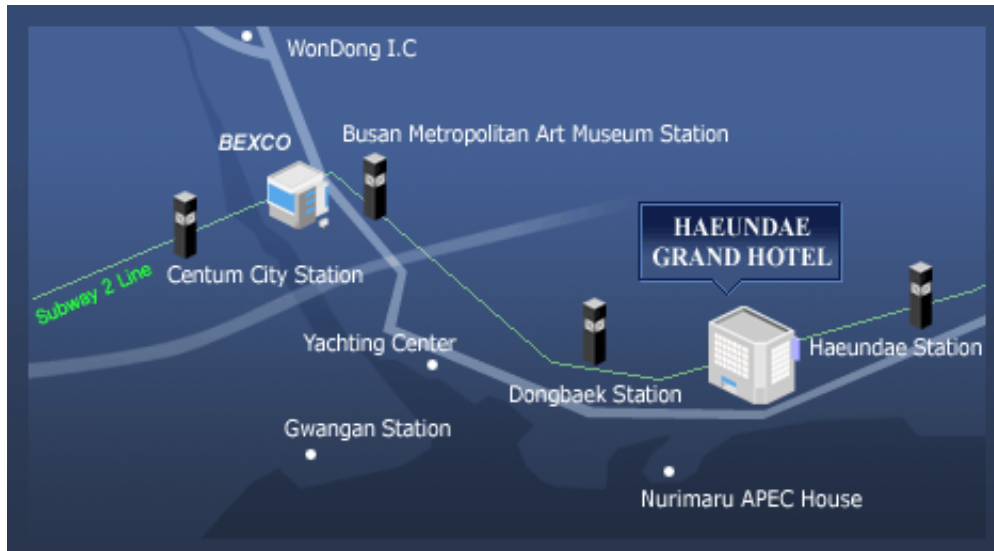

The special features of the hotel are its grand lobby, which has a three-story ceiling, lighted by a chandelier patterned after the Korean national flag, taekuk mark, and ocean waves, which boosts the high classic style of the hotel and glass elevators commanding a magnificent view of the pine trees along the beach.
